

8/22/2017

Pinnacle did not disappoint. Whether it was to learn more of the ins and outs to the industry, to gauge how other leaders are thriving, or for networking capabilities, over 700 vendors and exhibitors experienced how to best catapult from an EMS leader to a healthcare leader.

For Savvik, the opportunity to meet vendors who continue to impress the industry was the greatest takeaway. Featuring an ongoing video of real-life testimonials, from current day EMS and public safety workers, lured interested people to explore Savvik. ZOLL is a classic example of a Savvik vendor with its leading EMS products like Automated External Defibrillators, Related Equipment, Accessories & Product Upgrades, ALS Monitors / Defibrillators and Automated CPR Devices Related Equipment. These pieces of equipment are designed to meet today's protocols while anticipating changing needs in patient care and delivery models. They are designed to maximize care for the everyday situations encountered.

Plus, by being a Savvik member, the ZOLL experience is discounted. There is a 32% discount on AED Plus defibrillators and on AED Pro defibrillators, a 25% discount on all accessories and disposables, as well as on product upgrades, and discounts available on multiple unit sales, among other discounts and savings. ZOLL is focused on helping you improve outcomes with resuscitation and acute critical care technology. Its products and software solutions help EMS and fire fighters, as well as the military, provide life-saving care every day; something Savvik prides itself on. And much like Savvik and its goals, ZOLL delivers technology that advances emergency care and benefits patients at reasonable costs.

The relationship with ZOLL continues long after the Pinnacle experience, and the savings and reputable products remain with the Savvik stamp of approval.
